MONTHLY EPA, CDH, AND DOE/RFO MEETING - JEE-0414-92

Attached are the minutes from the June 3, 1992 meeting with the Environmental Protection Agency (EPA), the Colorado Department of Health (CDH), and DOE/RFO which EG&G Rocky Flats, Inc. (EG&G) personnel attended. We are interested in documenting two comments that are important to EG&G Environmental Management performance.

The first comment (page 5) refers to the choice of discharging treated water from OU 1 that is high in only one constituent: total dissolved solids (TDS). We feel the regulators' advice on this topic is important to understand so if future action is needed, DOE/RFO can proceed rapidly. We are operating the treatment system so the plant can avoid the need to discharge the effluent tank prior to re-treatment for TDS. Should the need to discharge the tank arise, however, EG&G will notify DOE/RFO promptly.

The second comment (page 4) addresses requirements under RCRA for used carbon from treatment systems. EPA feels our plans to store the used carbon units pending regeneration may be improper. We have started accumulating these units, and the issue may also encompass other media produced by environmental characterization and remediation. As of this date, we have directed that the spent carbon be managed as RCRA waste rather than awaiting the results of characterization analyses.

If DOE/RFO would like, EG&G will be able to provide minutes from these monthly meetings within our current Fiscal Year 1992 (FY92) work scope and funding.

Please obtain EPA and CDH concurrence that the attached minutes, especially on the two issues discussed above, accurately reflect their participation and comments.

J. E. Evered, Director
Environmental Management
